cer-e-bro-men-in-gi-tis (ser'ĕ-brō-men-in-jī SYN meningoencephalitis.

cer-e-brop-a-thy (ser-ĕ-brop'ă-thē). syn encep alopathy.

cer-e-bro-scle-ro-sis (ser'ĕ-brō-sklēr-ō'sis). cephalosclerosis, hardening of the cerebral her spheres. [cerebro- + G. sklērōsis, hardening] cer-e-bro-side (ser'ĕ-brō-sīd). A class of glyosphingolipid; c.'s are found in the myelin she of nerve tissue.

cer-e-bro-spi-nal (ser'ĕ-brō-spī-năl, sĕ-rē'brō Relating to the brain and the spinal cord.

cer-e-brot-o-my (ser-ĕ-brot'ō-mē). the brain. [cerebro- + G. tomē, incision]

cer-e-bro-vas-cu-lar (ser'ĕ-brō-vas'kyū-lăr). lating to the blood supply to the brain, partic larly with reference to pathologic changes. cer-e-brum, pl. ce-re-bra, cer-e-brums (ser) brum, se-re'brum; -bra; -brumz) [NA]. Origi

nally referred to the largest portion of the brain now usually refers only to the parts derived from the telencephalon and includes mainly the cen bral hemispheres (cerebral cortex and basal ga glia), [L., brain]

ce-ri-um (Ce) (sēr'ē-ŭm). A metallic elemen atomic no. 58, atomic wt. 140.115. [fr. Ceres, the

cer-ti-fi-a-ble (ser-ti-fi'ă-bl). Denoting a perso showing disordered behavior of sufficient graving to justify involuntary mental hospitalization.

cer-ti-fi-ca-tion (ser'ti-fi-kā'shun). 1. The attain ment of board certification in a specialty. 2. The court procedure by which a patient is committed to a mental institution. 3. Involuntary mental has

cer-ti-fied nurse-mid-wife. A registered n.-m with at least a master's degree in nursing and advanced education in the management of mater nity. Certification is achieved through an organic nized program of study and national testing by the American College of Nurse-Midwives.

ce-ru-lo-plas-min (sĕ-rū'lö-plaz-min). A blu copper-containing \alpha-globulin of blood plasme involved in copper transport and regulation, and can reduce O2 directly without known intermed ates. C. is absent in congenital Wilson's disease [L. caeruleus, dark blue]

ce-ru-men (se-ru'men). The soft, brownish ye low, waxy secretion (a modified sebum) of the ceruminous glands of the external auditory met tus. [L. cera, wax]

ce-ru-mi-nal (se-rū'mi-năl). Relating to cere

ce-ru-mi-no-lyt-ic (sĕ-rū'mi-nō-lit'ik). Any sub stance instilled into the external auditory canal of soften wax. [cerumen, + G. lysis, a loosening] ce-ru-mi-no-sis (se-rū-mi-nō'sis). Excessive for mation of cerumen.

ce-ru-mi-nous (sĕ-rū'mi-nŭs). Relating to cerv men

cer-vi-cal (ser'vĭ-kal). Relating to a neck, or car vix, in any sense. [L. cervix (cervic-), neck] cer-vi-cec-to-my (ser-vi-sek'tō-mē). Excision d the cervix uteri. syn trachelectomy. [cervix + 6

ektomē, excision] cer•vi•ces (-sēz).

cer-vi-ces (ser'vi-sēz). Plural of cervix.

cis (ser'vi-sis). cervi-ci-tis (ser-vi-sī'tis). Inflammation of the nucous membrane, frequently involving also the deeper structures, of the cervix uteri. SYN tracheli-

A cervix, or neck, in any sense. [L. cervix, neck]

cervi-co-brach-i-al (ser'vi-kō-brā'kē-ăl). Relating to the neck and the arm.

cervi-co-dyn-ia (ser'vi-kō-din'ē-ă). Neck pain. syn trachelodynia. [cervico- + G. odynē, pain] cervi-co-fa-cial (ser'vi-kō-fā'shăl). Relating to

the neck and the face. cer-vi-cog-ra-phy (ser-vi-kog'ră-fe). Technique, equivalent to colposcopy, for photographing part

or all of the uterine cervix. [cervix + G. graphō, to write] cer-vi-co-oc-cip-i-tal (ser'vi-kō-ok-sip'i-tăl). Re-

lating to the neck and the occiput. cer-vi-co-plas-ty (ser'vi-kō-plas-tē). Plastic surgery on the cervix uteri or on the neck.

cer-vi-co-tho-rac-ic (ser'vi-kō-thōr-as'ik). Relating to: 1. The neck and thorax; 2. The transition between the neck and thorax; 3. The fusion of these vertebrae.

cer-vi-cot-o-my (ser-vi-kot'ô-mē). Incision into the cervix uteri. syn trachelotomy. [cervico- + G. tomē, incision]

cer-vi-co-ves-i-cal (ser'vi-kō-ves'i-kăl). Relating to the cervix of the uterus and the bladder.

cer-vix, gen. cer-vi-cis, pl. cer-vi-ces (ser'viks, ser'vi-sis, -sēz) [NA]. 1. SYN collum. 2. Any necklike structure. 3. SYN c. of uterus. [L. neck] c. of uterus, the lower part of the uterus extending from the isthmus of the uterus into the vagina. It is divided into supravaginal and vaginal parts by its passage through the vaginal wall. SYN cervix (3) [NA].

ce-si-um (Cs) (sē'zē-um). A metallic element, atomic no. 55, atomic wt. 132.90543; a member of the alkali metal group. ¹³⁷Cs (half-life equal to 30.1 years) is used in treatment of certain malignancies. [L. caesius, bluish gray]

Ces-to-da (ses-tō'dă). A subclass of tapeworms including the segmented tapeworms that parasitize humans and domestic animals. [G. kestos, girdle]

ces-tode, ces-toid (ses'tod, -toyd). Common name for tapeworms of the class Cestoidea or its subclasses, Cestoda and Cestodaria.

Ces-toi-dea (ses-toy'dē-ă). The tapeworms, a class of platyhelminth flatworms characterized by lack of an alimentary canal and a segmented body with a scolex or holdfast organ at one end; adult worms are vertebrate parasites, usually found in the small intestine. [G. kestos, girdle, + eidos,

ce-tyl (sē'til). The univalent radical $C_{16}H_{33}$ - of cetyl alcohol.

CF citrovorum factor, coupling factor.

Cf californium.

CFU colony-forming unit.

CGS, cgs centimeter-gram-second. SEE centimeter-gram-second system.

chafe (chaf). To cause irritation of the skin by friction. [Fr. chauffer, to heat, fr. L. calefacio, to make warm]

cha•go•ma (sha-gō'mă). The skin lesion in acute Chagas' disease.

chain (chān). 1. In chemistry, a series of atoms held together by one or more covalent bonds. 2. In bacteriology, a linear arrangement of living cells that have divided in one plane and remain attached to each other. [L. catena]

A c., (1) a polypeptide component of insulin containing 21 amino acyl residues; insulin is formed by the linkage of an A c. to a B c.; (2) in general, one of the polypeptides in a multiprotein complex.

B c., a polypeptide component of insulin containing 30 amino acyl residues; insulin is formed by the linkage of a B c. to an A c.

heavy c., a polypeptide c. of high molecular weight determining the class and subclass of an immunoglobulin.

J c., a glycopeptide disulfide that is bonded to polymeric IgA and IgM; its function is to ensure correct polymerization of the subunits of IgA and IgM. [joining]

kinematic c., a combination of several joints linking several limb segments together during a

specific movement or posture.

light c., a polypeptide c. with low molecular weight, as the κ or λ c.'s in immunoglobulin.

side c., (1) a c. of noncyclic atoms linked to a benzene ring, or to any cyclic c. compound; (2) the atoms of an α -amino acid other than the α carboxyl group, the α-amino group, the α-carbon, and the hydrogen attached to the α -carbon. cha-la-sia, cha-la-sis (kă-lā'zē-ă, -lā'sis). Inhibi-

tion and relaxation of any previously sustained contraction of muscle, usually of a synergic group of muscles. [G. chalaō, to loosen]

cha-la-zi-on, pl. cha-la-zia (ka-lā'zē-on, -zē-ă). A chronic inflammatory granuloma of a meibomian gland. syn meibomian cyst, tarsal cyst. [G. dim. of chalaza, a sty]

chal·i·co·sis (kal-i-kô'sis). Pneumoconiosis caused by the inhalation of dust incident to the occupation of stone cutting. [G. chalix, gravel]

cha-lone (kā'lon). Any of a number of mitotic inhibitors elaborated by a tissue and active only on that type of tissue, regardless of species; a reversible tissue-specific mitotic inhibitor. [G. + chalao, to relax, + -one]

cham-ber (chām'ber). A compartment or enclosed space. SEE ALSO camera. [L. camera]

anechoic c., a soundproof environment in which reverberation is largely eliminated, for the performance of audiologic testing and research.

anterior c. of eye, the space between the cornea anteriorly and the iris/pupil posteriorly, filled with a watery fluid (aqueous humor) and communicating through the pupil with the posterior chamber. SYN camera anterior bulbi [NA].

aqueous c.'s, the combined anterior and posterior c.'s of the eye containing the aqueous

counting c., a standardized ruled-glass slide used for counting cells (especially erythrocytes and leukocytes) and other particulate material in a measured volume of fluid; such slides are frequently known as hemocytometers.

hyperbaric c., a c. providing pressures greater
